

Position Description

Mental Health Clinician

Reports to
Clinical Team Lead

Business Area
General Practice and Community Support

Position Objective:

The Mental Health Clinician provides a brief intervention talking therapy service for people referred by their General Practitioner experiencing psychological difficulties. Interventions are specific and short term, utilising Focused Acceptance and Commitment Therapy (FACT) as a practice framework.

Position Purpose:

- To work alongside General Practice teams to provide short term intervention, (using a FACT framework) in a GP extension role for patients with psychological difficulties and/or mental illness.
 - To act as a resource person for patients and General Practice to gain knowledge about and establish contact with community agencies and support services.
 - To assess needs of patients and to link in with appropriate resources or provide short term treatment, that may include problem-solving, goal setting, psychosocial interventions, crisis resolution, stress management and education around illness and prevention.
 - Assist in gathering information for General Practice around issues affecting mental health and psychosocial factors that if addressed would assist in treatment.
 - Where there are more serious mental health concerns or risk factors, liaising with the patients General Practitioner as to a referral to Specialist Mental Health Services.
 - To provide written communication back to General Practice throughout contact with the patient.
 - All work is carried out within the guidelines of the service provision framework.
-

Dimensions
